

Custom Boot Screen Guide

Important Notes:

- **I AM NOT RESPONSIBLE FOR YOUR COMPUTER**
- It's important to mention that [Metabolix/HackBGRT](#) are not commonly used tools and might not be suitable for most students, It may be used for more advanced students who are interested in the topic of BIOS modification.
- Also, before using these tools on a computer, ensure that you have the computer's owner's permission and understand the risks involved in modifying the BIOS, as it can cause the computer to **become unbootable** if not done correctly.
 - This means that you might lose everything on your windows drive 🗑️ (C:) and need to reinstall windows and all the applications from the first lesson.

Objective:

- Students will be able to understand the purpose and basic functionality of [Metabolix/HackBGRT](#).

Introduction:

- Please watch/read the following resource to familiarize yourself with the software.
 - This video explains the [BIOS and UEFI As Fast As Possible](#).
 - [HackBGRT Readme File](#) to understand the usage.

Instructions:

Please watch the following video:

Custom Boot Screen Guide

Key Points:

- Make sure that your computer uses UEFI
- Disable Secure Boot
- Design an image with the size: 200x200px - 300x300px
- Save it as `splash.bmp`
- Copy and paste through `mspaint` folder menu
- I personally recommend keeping all of the files in your pictures folder 📁 so if anything happens you have an additional copy.
